Acme Flow Service Level Agreement (2026)

This Service Level Agreement ("SLA") applies to customers on the Business and Enterprise plans from January 1, 2026. It replaces the 2025 SLA. Starter and Team plans are provided without an uptime commitment.

1. Uptime commitment

Acme will make the Acme Flow service available at least 99.9% of the time in each calendar month for Business customers, and at least 99.95% of the time in each calendar month for Enterprise customers.

"Available" means that the public API and the web application respond successfully to requests, measured every minute from at least three external locations. A minute counts as unavailable when more than 5% of requests fail with server errors. Monthly uptime is the percentage of available minutes in the calendar month.

For example, a 30-day month has 43,200 minutes. A commitment of 99.95% allows about 21.6 minutes of unavailability in such a month, and a commitment of 99.9% allows about 43.2 minutes.

2. Service credits

If monthly uptime falls below the commitment, the customer is entitled to a credit on the monthly fee of the affected plan, according to the following table:

Plan	Monthly uptime	Credit
Enterprise	below 99.95% but at least 99.5%	10%
Enterprise	below 99.5% but at least 99.0%	20%
Enterprise	below 99.0%	30%
Business	below 99.9% but at least 99.0%	10%
Business	below 99.0%	25%

The maximum credit for a month is 30% of the monthly fee for Enterprise customers and 25% of the monthly fee for Business customers.

3. Requesting credits

Customers must request credits through Customer Support within 30 days after the end of the affected month. Acme may also issue credits proactively after a major incident. Credits are applied to the next invoice and are not paid out in cash.

4. Scheduled maintenance

Scheduled maintenance takes place in the weekly maintenance window, Sunday 02:00 to 06:00 UTC, and is announced at least 72 hours in advance on the status page. Scheduled maintenance of up to 4 hours per month does not count as unavailability.

5. Exclusions

Unavailability does not count against uptime when it is caused by third-party services outside Acme's control (including connected third-party tools), by the customer's own actions or configuration, by suspension of the account for non-payment or abuse, or by force majeure.

6. Sole remedy

Service credits are the customer's sole and exclusive remedy for failure to meet the uptime commitment, unless the customer's Enterprise agreement states otherwise.

7. Changes from the 2025 SLA

The Enterprise uptime commitment increased from 99.9% to 99.95%, Enterprise credits now have three levels (10%, 20% and 30%), and the maximum Enterprise credit increased from 25% to 30%. The Business commitment and credits are unchanged.
